- A Center of back to Cuff
- B Length of Jacket
- C Width of Jacket
- D Cuff width
- G Length of Skirt
- E Length of Pants
- F Inseam

JUDO PANTS SHRINKAGE

All Judo pants will shrink 4 to 12cm depending on washing temperature and drying method. So far there is no such thing as a pre shrunk Judo gi pants.

WASHING RECOMMENDATION

It is recommended that once you have shrink your uniform to the desired fitment, that you wash your uniform in cold water and hang dry to prevent further changes in fitment.

To Soften your gi wash with fabric softener, dry in the dryer or hang dry and fluff in the dryer for 5 to 10 minutes in low heat or just air setting.

Always wash your new gi the first time in cold water and hang dry to see how much shrinkage has occurred. Shrink your gi gradually as there is no going back once you over shrunk your new gi.

NOTE

This list is for reference only, as cotton or materials used for manufacturing varies every time; so does the shrinkage. The water temperature of your washing machine and dryer also varies the shrinkage of your uniform.
